

Fursa (فرصة)

Complete Project Documentation

Gaza's Digital Employment Platform • Arabic/RTL-First • May 2026

1. Project Overview

Fursa (فرصة, meaning opportunity) is a bilingual (Arabic/English) digital employment platform built for Gaza. It supports three user roles — job seekers, employers, and admins — each with their own dashboard, profile, and set of capabilities.

Goals

- Provide a centralized, trustworthy job board for Gaza
- Full RTL (right-to-left) support for Arabic-speaking users
- Instant AR/EN language toggle without page reload
- Role-based access control enforced on frontend and backend
- Production-grade authentication via Clerk (Google sign-in, email/password)

2. Tech Stack

Layer	Technology
Frontend	React 18, Vite, TypeScript, Tailwind CSS v4
Routing	Wouter
State / Data Fetching	TanStack Query v5
UI Components	shadcn/ui (Radix UI primitives)
Authentication	Clerk (with Clerk React SDK)
Backend	Express.js + TypeScript
ORM	Drizzle ORM
Database	Supabase PostgreSQL
Monorepo	pnpm workspaces
API Codegen	OpenAPI + @workspace/api-client-react

3. Environment Variables & Secrets

Frontend

Variable	Description
VITE_CLERK_PUBLISHABLE_KEY	Clerk publishable key (starts with pk_)
VITE_API_URL	Base URL of the API server
VITE_BASE_PATH	App base path (usually /)
PORT	Vite dev server port
VITE_CLERK_PROXY_URL	(Production) Clerk proxy URL

API Server

Variable	Description
PORT	API server port (default 3001, Replit: 8080)
DATABASE_URL	PostgreSQL connection string (Supabase)
CLERK_SECRET_KEY	Clerk secret key (starts with sk_)
CLERK_PUBLISHABLE_KEY	Clerk publishable key

4. Database Schema

users

Column	Type	Notes
id	text PRIMARY KEY	Clerk user ID (user_XXX)
email	text NOT NULL UNIQUE	
name	text	Display name
role	text	seeker employer admin
bio / phone / location	text	Optional profile fields
createdAt / updatedAt	timestamp	

jobs

Column	Type	Notes
id	serial PRIMARY KEY	
title / description	text NOT NULL	
location	text	
type	text	full-time part-time remote contract
salary	text	Optional salary range
status	text	draft active closed
employerId	text FK	References users.id

applications

Column	Type	Notes
id	serial PRIMARY KEY	
jobId / seekerId	FK references	jobs.id / users.id
coverLetter	text	Optional
status	text	pending reviewed accepted rejected

5. API Reference

Base URL (local): `http://localhost:3001` | Auth: Authorization: Bearer <token>

Method	Path	Description	Auth
GET	/me	Get current user profile	Required
PATCH	/me	Update current user profile	Required
POST	/me/onboard	Set user role	Required
GET	/jobs	List active jobs (?q=, ?location=, ?type=)	Optional
GET	/jobs/:id	Get job detail	Optional
GET	/employer/jobs	List employer's own jobs	employer
POST	/employer/jobs	Create a new job listing	employer
PATCH	/employer/jobs/:id	Update a job listing	employer
DELETE	/employer/jobs/:id	Delete a job listing	employer
GET	/applications	Get seeker's applications	seeker
POST	/applications	Apply to a job	seeker
DELETE	/applications/:id	Withdraw application	seeker
GET	/employer/applications/:jobId	List applicants for a job	employer
PATCH	/employer/applications/:id	Update application status	employer
GET/	/saved-jobs	Get/remove seeker's saved jobs	seeker
POST	/saved-jobs	Save a job	seeker
GET	/admin/jobs	List all jobs (any status)	admin
GET	/admin/users	List all users	admin
PATCH/	/admin/jobs/:id	Moderate or delete any job	admin
PATCH/	/admin/users/:id	Update or delete any user	admin

DELETE

6. Roles & Permissions

Action	Guest	Seeker	Employer	Admin
Browse / view jobs	Yes	Yes	Yes	Yes
Apply to a job	—	Yes	—	—
Save a job	—	Yes	—	—
Post a job	—	—	Yes	—
Edit / delete own jobs	—	—	Yes	—
View job applicants	—	—	Yes	—
Moderate any job	—	—	—	Yes
Manage all users	—	—	—	Yes

7. Frontend Architecture

Routing

- AuthLayout — for /sign-in and /sign-up. No Header or Footer.
- AppLayout — for all other routes. Includes Header and Footer with RoleGuard.

State Management

State Type	Solution
Server state	TanStack Query v5
Language / locale	Zustand store in lib/i18n.tsx
Auth state	Clerk React SDK

8. Authentication

- Social login: Google OAuth + email/password via Clerk
- Frontend reads VITE_CLERK_PUBLISHABLE_KEY
- API server verifies JWT tokens using CLERK_SECRET_KEY
- New users are sent to /onboarding to choose their role

9. Internationalization (i18n)

- Zustand store holds current language: ar (Arabic) or en (English)
- useT() hook returns translation function t(key)
- Language persisted to localStorage as fursa_lang
- HTML dir and lang attributes updated reactively on toggle

Key	Arabic	English
app.name	فُرصة	Fursa
app.description	غزة في , الرقمية التوظيف منصة	Gaza's Digital
nav.home	الرئيسية	Home
nav.jobs	الوظائف	Jobs
auth.signIn	الدخول تسجيل ,	Sign In
auth.signUp	حساب إنشاء	Sign Up

10. Pages & Routes

Path	Description
/	Hero + job search + featured listings
/jobs	Job listing with search + filters
/jobs/:id	Job detail with apply button
/about	Platform mission, values, CTA
/seeker	Seeker dashboard
/seeker/applications	My applications list
/seeker/saved	Saved jobs list
/employer	Employer dashboard
/employer/jobs	Manage job listings
/employer/jobs/new	Create a new job
/admin	Admin dashboard
/admin/jobs	Moderate all jobs
/admin/users	Manage all users

11. Known Limitations & Future Work

Current Limitations

- No email notifications for application status changes
- No CV/file upload — seekers describe experience in bio text
- No real-time features — applications list requires manual refresh
- Admin approval workflow not yet fully implemented end-to-end

Suggested Future Features

- Email notifications via Resend or similar
- CV/resume file upload using Supabase Storage
- Real-time notifications via Server-Sent Events or WebSockets
- Job categories and advanced filtering

- Employer verification system
- Analytics dashboard for admins
- Mobile app (Expo/React Native)
